Advanced
solid-state
technology.

Exceptional
performance
& longevity.

No moving parts equals rock solid reliability. Each panel is IP67 rated for the toughest environments, meaning through rain, heat, or snow, you can have confidence that your display is up and running.

60% LIGHTER

Easy installs.

Our modular architecture and aluminum frame system make our displays the lightest **on the market.**

60% lighter than the competition, which makes installation a breeze.

A traditional 4'x8' double-sided display weighs about 814 lbs.

Our modular double-sided display weighs only a fraction of that at **320 lbs.**

FULL SERVICE FABRICATION & INSTALLATION COMPANY

HIGH QUALITY DISPLAYS

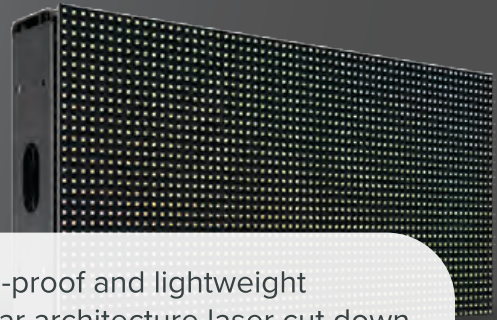

Premium components made in the United States, assembled and certified in Canada, on Vancouver Island

The component manufacturing process utilizes one of the most advanced Surface Mount Robotic production assembly lines in the world and uses the highest quality globally sources components.

Honeycombed structure that reduces contraction and expansion in different environmental conditions.

Future-proof and lightweight modular architecture laser cut down to the millimeter with edge-to-edge viewing area and IP67 rated for the toughest environments.

Every mod has advanced software embedded on a chip with a high speed micro-processor.

Advanced and almost unbreakable stepped louver design that displaces light and provides better contrast.

The most advanced controller on the market with auto-mapping, automated diagnostic notifications, cellular/Wifi, and power cycling on board.
